

# Introducing SCOUT

## Maximise Your Microsoft Investment

SCOUT is an AI-driven cloud optimisation platform, surfacing deep analytics and powerful actionable insights to help you make the most of your Microsoft investment.

Using read-only access, SCOUT delves deeper into Microsoft 365 and Azure environments than even native tooling, delivering actionable insights into cost, security, hybrid working and much more.

Whether your organisation is focused on driving adoption, freeing up resources for reinvestment in digital transformation, or just curious about what's possible in the world of FinOps, SCOUT's intelligence is a valuable asset.

- **Secure, read-only access**
- **Microsoft expertise**
- **Dashboards refreshed daily**
- **Quick onboarding**
- **Insight beyond native reporting**

### Control

Wield AI-powered intelligence to make decisive and informed business decisions, tapping into cost transparency, automated insights, and powerful metrics – presented in a persona-based experience.

### Optimise

Maximise your Microsoft investment by identifying and acting on cost-saving recommendations, enhancing productivity through automation, and streamlining your licences - all from one place.

### Secure

Close lingering security gaps and make headway on your Zero Trust journey by resolving joiner/mover/leaver vulnerabilities, automating governance, and securing user identities.

### Key Features

Convert waste to value, with an average 18-37%\* savings possible.

Improve ROI through user adoption, cost optimisation, and licence automation.

Minimise risk, secure JML accounts, and understand admin roles.

Support business decisions with powerful intelligence.

Easy to understand dashboards in a persona-based experience.

Underpin FinOps activities with insights aligned to FinOps principles.

Read-only access and fast onboarding for speed to data.
